Chemung County Nursing Facility

Comprehensive Emergency Management Plan Template

Part II – Template

2020
Instructions

The NYSDOH Comprehensive Emergency Management (CEMP) Template is a tool to help facilities develop and maintain facility-specific CEMPs. For 2020, Appendix K has been updated to include guidance and formatted to provide a form to comply with the new requirements of Chapter 114 of the Laws of 2020 for the development of a Pandemic Emergency Plan (PEP). The plan template is designed to help facilities easily identify the information needed to effectively plan for, respond to, and recover from natural and man-made disasters. All content in this template should be reviewed and tailored to meet the needs of each facility.

Refer to Part 1 – Instructions for additional information about completion of this template.

Refer to Part 3 – Toolkit for supplementary tools and templates to inform CEMP development and implementation.
Emergency Contacts

The following table lists contact information for public safety and public health representatives for quick reference during an emergency.

Table 1: Emergency Contact Information

<table>
<thead>
<tr>

ANNEX E: PANDEMIC CHECKLIST 44
1 Background

1.1 Introduction

To protect the well-being of residents, staff, and visitors, the following all-hazards Comprehensive Emergency Management Plan (CEMP) has been developed and includes considerations necessary to satisfy the requirements for a Pandemic Emergency Plan (PEP). Appendix K of the CEMP has been adjusted to meet the needs of the PEP and will also provide facilities a form to post for the public on the facility's website, and to provide immediately upon request. The CEMP is informed by the conduct of facility-based and community-based risk assessments and pre-disaster collaboration with local hospitals, nursing homes, mutual aid partners, and local emergency management agencies.

This CEMP is a living document that will be reviewed annually, at a minimum, in accordance with Section 7: Plan Development and Maintenance.

1.2 Purpose

The purpose of this plan is to describe the facility's approach to mitigating the effects of, preparing for, responding to, and recovering from natural disasters, man-made incidents, and/or facility emergencies.
1.3 Scope

The scope of this plan extends to any event that disrupts, or has the potential to significantly disrupt, the provision of normal standards of care and/or continuity of operations, regardless of the cause of the incident (i.e., man-made or natural disaster).

The plan provides the facility with a framework for the facility’s emergency preparedness program and utilizes an all-hazards approach to develop facility capabilities and capacities to address anticipated events.

Bethany Manor will coordinate disaster planning with other Bethany Village entities as outlined in our disaster manual and mutual aid agreements.
1.4 Situation

1.4.1 Risk Assessment

The facility conducts an annual risk assessment to identify which natural and man-made hazards pose the greatest risk to the facility (i.e., human and economic losses based on the vulnerability of people, buildings, and infrastructure).

The facility conducted a facility-specific risk assessment on 8/26/20 and determined the following hazards may affect the facility’s ability to maintain operations before, during, and after an incident:

- Staffing
- Supply chain disruption
- Lack of supplies and PPE

This risk information serves as the foundation for the plan—including associated policies, procedures, and preparedness activities.

---

2 The Hazard Vulnerability Analysis (HVA) is the industry standard for assessing risk to healthcare facilities. Facilities may rely on a community-based risk assessment developed by public health agencies, emergency management agencies, and Health Emergency Preparedness Coalition or in conjunction with conducting its own facility-based assessment. If this approach is used, facilities are expected to have a copy of the community-based risk assessment and to work with the entity that developed it to ensure that the facility’s emergency plan is in alignment.
1.4.2 Mitigation Overview

The primary focus of the facility’s pre-disaster mitigation efforts is to identify the facility’s level of vulnerability to various hazards and mitigate those vulnerabilities to ensure continuity of service delivery and business operations despite potential or actual hazardous conditions.

To minimize impacts to service delivery and business operations during an emergency, the facility has completed the following mitigation activities:

- Development and maintenance of a CEMP;
- Procurement of emergency supplies and resources;
- Establishment and maintenance of mutual aid and vendor agreements to provide supplementary emergency assistance;
- Regular instruction to staff on plans, policies, and procedures; and
- Validation of plans, policies, and procedures through exercises.³

For more information about the facility’s fire prevention efforts (e.g., drills), safety inspections, and equipment testing, please refer to the [name of facility’s fire p

1.5 Planning Assumptions

This plan is guided by the following planning assumptions:

- Emergencies and disasters can occur without notice, any day, and on any shift.
- Emergencies and disasters may be facility-specific, local, regional, or state-wide.
- Local and/or state authorities may declare an emergency.
- The facility may receive requests from other facilities for resource support (supplies, equipment, staffing, or to serve as a receiving facility).
- Facility security may be compromised during an emergency.
- The emergency may exceed the facility’s capabilities and external emergency resources may be unavailable. The facility is expected to be able to function without an influx of outside supplies or assistance for 72 hours.
- Power systems (including emergency generators) could fail.
- During an emergency, it may be difficult for some staff to get to the facility, or alternately, they may need to stay in the facility for a prolonged period of time.

³ Refer to the “Training and Exercises” section of this plan for additional information about pre-incident trainings and exercises.
2 Concept of Operations

2.1 Notification and Activation

2.1.1 Hazard Identification

The facility may receive advance warning about an impending natural disaster (e.g., hurricane forecast) or man-made threat (e.g., law enforcement report), which will be used to determine initial response activities and the movement of personnel, equipment, and supplies. For no-notice incidents (e.g., active shooter, tornado), facilities will not receive advance warning about the disaster, and will need to determine response activities based on the impact of the disaster.

The Incident Commander may designate a staff member to monitor evolving conditions, typically through television news, reports from government authorities, and weather forecasts.

All staff has a responsibility to report potential or actual hazards or threats to their direct supervisor.

2.1.2 Activation

Upon notification of hazard or threat—from staff, residents, or external organizations—the senior-most on-site facility official will determine whether to activate the plan based on one or more of the triggers below:

- The provision of normal standards of care and/or continuity of operations is threatened and could potentially cause harm.
- The facility has determined to implement a protective action.
- The facility is serving as a receiving facility.
- The facility is testing the plan during internal and external exercises (e.g., fire drills).
- The STMAP has been activated.

If one or more activation criteria are met and the plan is activated, the senior-most on-site facility official—or the most appropriate official based on the incident—will assume the role of “Incident Commander” and operations proceed as outlined in this document.
2.1.3 Staff Notification

Once a hazard or threat report has been made, an initial notification message will be disseminated to staff in accordance with the facility’s communication plan.

Department Managers or their designees will contact on-duty personnel to provide additional instructions and solicit relevant incident information from personnel (e.g., status of residents, status of equipment).

Once on-duty personnel have been notified, Department Managers will notify off-duty personnel if necessary and provide additional guidance/instruction (e.g., request to report to facility).

Department personnel are to follow instructions from Department Managers, keep lines of communication open, and provide status updates in a timely manner.

2.1.4 External Notification

Depending on the type and severity of the incident, the facility may also notify external parties (e.g., local office of emergency management, resource vendors, relatives and responsible parties) utilizing local notification procedures to request assistance (e.g., guidance, information, resources) or to provide situational awareness.

The NYSDOH Regional Office is a mandatory notification recipient regardless of hazard type, while other notifications may be hazard-specific. Table 4: Notification by Hazard Type provides a comprehensive list of mandatory and recommended external notification recipients based on hazard type.

</tbody>
</table>

⁴ “Active threat” is defined as an individual or group of individuals actively engaged in killing or attempting to kill people in a populated area. Example attack methods may include bombs, firearms, and fire as a weapon.

⁵ “CBRNE” refers to “Chemical, Biological, Radiological, Nuclear, or Explosive”

⁶ To notify NYSDOH of an emergency during business hours (non-holiday weekdays from 8:00 am – 5:00 pm), the Incident Commander will contact the NYSDOH Regional Office at 1-585-423-8020. Outside of normal business hours (e.g., evenings, weekends, or holidays), the Incident Commander will contact the New York State Watch Center (Warning Point) at 518-292-2200. The Watch Command will return the call and will ask for the type of emergency and the type of facility (e.g. hospital, nursing home, adult home) involved. The Watch Command will then route the call to the Administrator on Duty, who will assist the facility with response to the situation.
2.2 Mobilization

2.2.1 Incident Management Team

Upon plan activation, the Incident Commander will activate some or all positions of the Incident Management Team, which is comprised of pre-designated personnel who are trained and assigned to plan and execute response and recovery operations.

Incident Management Team activation is designed to be flexible and scalable depending on the type, scope, and complexity of the incident. As a result, the Incident Commander will decide to activate the entire team or select positions based on the extent of the emergency.

Table 5 outlines suggested facility positions to fill each of the Incident Management Team positions. The most appropriate individual given the event/incident may fill different roles as needed.

Table 5: Incident Management Team - Facility Position Crosswalk

<table>
<thead>
<tr>
<th>Incident Position</th>
<th>Facility Position Title</th>
<th>Description</th>
</tr>

</tr>
<tr>
<td>Operations Section Chief</td>
<td>Infection Control Practitioners, Registered Nurses</td>
<td>Manages tactical operations executed by staff (e.g., continuity of resident services, administration of first aid).</td>
</tr>
</tbody>
</table>
### Incident Position | Facility Position Title | Description
---|---|---
Planning Section Chief | Director of Staff Dev | Collects and evaluates information to support decision-making and maintains incident documentation, including staffing plans.
Logistics Section Chief | Purchasing Director, Nursing Service | Locates, distributes, and stores resources, arranges transportation, and makes alternate shelter arrangements with receiving facilities.
Finance/Admin Section Chief | Fiscal Finance Supervisor, Human Resource Director | Monitors costs related to the incident while providing accounting, procurement, time recording, and cost analyses.

If the primary designee for an Incident Management Team position is unavailable, **Table 6** identifies primary, secondary, and tertiary facility personnel that will staff Incident Management Team positions.

While assignments are dependent upon the requirements of the incident, available resources, and available personnel, this table provides initial options for succession planning, including shift changes.

**Table 6: Orders of Succession**

</tbody>
</table>
2.2.2 Command Center

The Incident Commander will designate a space, e.g., facility conference room or other large gathering space, on the facility premises to serve as the centralized location for incident management and coordination activities, also known as the “Command Center.”

The designated location for the Command Center is the Manor reception desk and the secondary/back-up location is the Manor conference room, unless circumstances of the emergency dictate the specification of a different location upon activation of the CEMP, in which case staff will be notified of the change at time of activation.

2.3 Response

2.3.1 Assessment

The Incident Commander will convene activated Incident Management Team members in the Command Center and assign staff to assess designated areas of the facility to account for residents and identify potential or actual risks, including the following:

- Number of residents injured or affected;
- Status of resident care and support services;
- Extent or impact of the problem (e.g., hazards, life safety concerns);
- Current and projected staffing levels (clinical, support, and supervisory/managerial);
- Status of facility plant, utilities, and environment of care;
- Projected impact on normal facility operations;
- Facility resident occupancy and bed availability;
- Need for protective action; and
- Resource needs.

2.3.2 Protective Actions

Refer to Annex A: Protective Actions for more information.

2.3.3 Staffing

Based on the outcomes of the assessment, the Planning Section Chief will develop a staffing plan for the operational period (e.g., remainder of shift). The Operation Section Chief will execute the staffing plan by overseeing staff execution of response activities. The Finance/Administration Section Chief will manage the storage and processing of timekeeping and related documentation to track staff hours.
2.4 Recovery

2.4.1 Recovery Services

Recovery services focus on the needs of residents and staff and help to restore the facility’s pre-disaster physical, mental, social, and economic conditions.

Recovery services may include coordination with government, non-profit, and private sector organizations to identify community resources and services (e.g., employee assistance programs, state and federal disaster assistance programs, if eligible). Pre-existing facility- and community-based services and pre-established points of contact are provided in Table 7.

<table>
<thead>
<tr>

<td>607-936-3753</td>
</tr>
<tr>
<td>E.A.P.</td>
<td>Counseling Services</td>
<td>607-737-4063</td>
</tr>
</tbody>
</table>

Ongoing recovery activities, limited staff resources, as well as the incident’s physical and mental health impact on staff members may delay facility staff from returning to normal job duties, responsibilities, and scheduling.

Resuming pre-incident staff scheduling will require a planned transition of staff resources, accounting for the following considerations:

- Priority staffing of critical functions and services (e.g., resident care services, maintenance, dining services).
- Personal staff needs (e.g., restore private residence, care for relatives, attend memorial services, mental/behavioral health services).
- Continued use or release of surge staffing, if activated during incident.
2.4.2 Demobilization

As the incident evolves, the Incident Commander will begin to develop a demobilization plan that includes the following elements:

- Activation of re-entry/repatriation process if evacuation occurred;\(^7\)
- Deactivation of surge staffing;
- Replenishment of emergency resources;
- Reactivation of normal services and operations; and
- Compilation of documentation for recordkeeping purposes.

2.4.3 Infrastructure Restoration

Once the Incident Commander has directed the transition from incident response operations to demobilization, the facility will focus on restoring normal services and operations to provide continuity of care and preserve the safety and security of residents.

Table 8 outlines entities responsible for performing infrastructure restoration activities and related contracts/agreements.

</tr>
</tbody>
</table>

2.4.4 Resumption of Full Services

Department Managers will conduct an internal assessment of the status of resident care services and advise the Incident Commander and/or facility leadership on the prioritization and timeline of recovery activities.

Special consideration will be given to services that may require extensive inspection due to safety concerns surrounding equipment/supplies and interruption of utilities support and resident care services that directly impact the resumption of services (e.g., food service, laundry).

Staff, residents, and relatives/responsible parties will be notified of any services or resident care services that are not available, and as possible, provided updates on timeframes for resumption.

The Planning Section Chief will develop a phased plan for resumption of pre-incident staff scheduling to help transition the facility from surge staffing back to regular staffing levels.

2.4.5 Resource Inventory and Accountability

Full resumption of services involves a timely detailed inventory assessment and inspection of all equipment, devices, and supplies to determine the state of resources post-disaster and identify those that need repair or replacement.

All resources, especially resident care equipment, devices, and supplies, will be assessed for health and safety risks. Questions on resource damage or potential health and safety risks will be directed to the original manufacturer for additional guidance.
3 Information Management

3.1 Critical Facility Records

Critical facility records that require protection and/or transfer during an incident include:

- Progress Notes
- Medication Administration Records
- Treatment Administration Records
- Orders Portal
- Face Sheets

Bethany Manor utilizes two cloud-based software programs that contain medical record information, Point Click Care and Practice Fusion. If computer systems are interrupted or non-functional, the facility will utilize paper-based recordkeeping in accordance with internal facility procedures.

3.2 Resident Tracking and Information-Sharing

3.2.1 Tracking Evacuated Residents

The facility will use the New York State Evacuation of Facilities in Disasters System ("eFINDS")\(^8\) and the Resident Evacuation Critical Information and Tracking Form\(^9\) to track evacuated residents and ensure resident care is maintained.

Resident Confidentiality

The facility will ensure resident confidentiality throughout the evacuation process in accordance with the Health Insurance Portability and Accountability Act Privacy Rule (Privacy Rule), as well as with any other applicable privacy laws. Under the Privacy Rule, covered health care providers are permitted to disclose protected health information to public health authorities authorized by law to collect protected health information to control disease, injury, or disability, as well as to public or private entities authorized by law or charter to assist in disaster relief efforts. The Privacy Rule also permits disclosure

---

\(^8\) eFINDS is a secure, confidential system intended to provide authorized users with real-time access to the location of residents evacuated during an emergency event. The system is to be used to log and track residents during an urgent or non-emergent evacuation. See Appendix K of the NYSDOH Evacuation Plan Template for further information and procedures on eFINDS.

\(^9\) The Resident Evacuation Critical Information and Tracking Form is a standardized form utilized to provide pertinent individual resident information to receiving facilities and provide redundant tracking during the evacuation process, including repatriation. See Appendix L of the NYSDOH Evacuation Plan Template for the complete form.

10 see HIPAA privacy rule information in CEMP toolkit, Annex K or: https://www.hhs.gov/sites/default/files/ocr/privacy/hipaa/understanding/special/emergency/hipaa-privacy-emergency-situations.pdf
of protected health information in other circumstances. Private counsel should be consulted where there are specific questions about resident confidentiality.

3.3 Staff Tracking and Accountability

3.3.1 Tracking Facility Personnel

The facility will use the New York State Evacuation of Facilities in Disasters System (“eFINDS”)\(^\text{10}\) and the Resident Evacuation Critical Information and Tracking Form\(^\text{11}\) to track staff.

3.3.2 Staff Accountability

Staff accountability enhances site safety by allowing the facility to track staff locations and assignments during an emergency. Staff accountability procedures will be implemented as soon as the plan is activated.

The facility will utilize sign-in/out logs to track the arrival and departure times of staff. During every operational period (e.g., shift change), Department Managers or designees will conduct an accountability check to ensure all on-site staff is accounted for.

If an individual becomes injured or incapacitated during response operations, Department Managers or designees will notify the Incident Commander to ensure the staff member’s status change is reflected in the facility-specific system such as sign-in/out logs.

3.3.3 Non-Facility Personnel

The Incident Commander—or Logistics Section Chief, if activated—will ensure that appropriate credentialing and verification processes are followed. Throughout the response, the Incident Commander—or Planning Section Chief, if activated—will track non-facility personnel providing surge support along with their respective duties and the number of hours worked.

---

\(^{10}\) eFINDS is a secure, confidential system intended to provide authorized users with real-time access to the location of residents evacuated during an emergency event. The system is to be used to log and track residents during an urgent or non-emergent evacuation. See Appendix K of the NYSDOH Evacuation Plan Template for further information and procedures on eFINDS.

\(^{11}\) The Resident Evacuation Critical Information and Tracking Form is a standardized form utilized to provide pertinent individual resident information to receiving facilities and provide redundant tracking during the evacuation process, including repatriation. See Appendix L of the NYSDOH Evacuation Plan Template for the complete form.
4 Communications

4.1 Facility Communications

As part of CEMP development, the facility conducted a communications assessment to identify existing facility communications systems, tools, and resources that can be leveraged during an incident and to determine where additional resources or policies may be needed.

Primary (the best and intended option) and alternate (secondary back-up option) methods of communication are outlined in Table 9.

Table 9: Methods of Communication

4.1.1 Communications Review and Approval

The Public Information Officer or Chemung County Executive will approve the dissemination of communications materials (e.g., pre-scripted messages)

12 An emergency notification system is a one-way broadcast, sometimes coordinated by a third-party vendor, and is not required by NYSDOH.
Upon plan activation, the Incident Commander may designate a staff member as the Public Information Officer to serve as the single point of contact for the development, refinement, and dissemination of internal and external communications.

Key Public Information Officer functions include:

- Develops and establishes mechanisms to rapidly receive and transmit information to local emergency management;
- Develops situational reports/updates for internal audiences (staff and residents) and external audiences;
- Develops coordinated, timely, consistent, and reliable messaging and/or tailor pre-scripted messaging;
- Conducts direct resident and relative/responsible party outreach, as appropriate; and
- Addresses rumors and misinformation.

4.2 Internal Communications

4.2.1 Staff Communication

The facility maintains a Position Control of all staff members, including emergency contact information at the Human Resources department. To prepare for impacts to communication systems, the facility also maintains redundant forms of communication with on-site and off-site staff. The facility will ensure that all staff is familiar with internal communication equipment, policies, and procedures.

4.2.2 Staff Reception Area

Depending on the nature of the incident, the facility may choose to establish a staff reception area (e.g., in a break room or near the time clock) to coordinate and check-in staff members as they arrive to the facility to support incident operations.

The staff reception area also provides a central location where staff can receive job assignments, checklists, situational updates, and briefings each time they report for their shift. Implementing a sign-in/sign-out system at the staff reception area will ensure full staff accountability. The staff reception area also provides the Incident Commander with a central location for staffing updates and inquiries.

4.2.3 Resident Communication

Upon admission, annually, and prior to any recognized threat, the facility will educate residents and responsible parties on the CEMP efforts. Resident communication may include facility-
specific (e.g., admission documentation, Resident Council meetings, resident group meetings, Family Council meetings, mailings, etc.).

During and after an incident, the Incident Commander—or Public Information Officer, if activated—will establish a regular location and frequency for delivering information to staff, residents, and on-site responsible parties (e.g., set times throughout the day), recognizing that message accuracy is a key component influencing resident trust in the facility and in perceptions of the response and recovery efforts.

Communication will be adapted, as needed, to meet population-specific needs, including memory-care residents, individuals with vision and/or hearing impairments, and individuals with other access and functional needs.

4.3 External Communications

Under no circumstances will protected health information be released over publicly-accessible communications or media outlets. All communications with external entities shall be in plain language, without the use of codes or ambiguous language.

4.3.1 Corporate/Parent Organization

Chemung County Nursing Facility will coordinate all messaging with Public Information Officer to ensure external communications are in alignment with corporate policies, procedures, and brand standards. Prior to an incident, the facility will coordinate with Chemung County to ensure an on-site facility staff member(s) has authorization and approval to disseminate messages.

4.3.2 Authorized Family and Guardians

The facility maintains a master list of all identified authorized family members and guardian’s (responsible parties’) contact information, including phone numbers and email addresses at virtual and/or physical location. Such individuals will receive information about the facility’s preparedness efforts upon admission.

During an incident, the facility will notify responsible parties about the incident, status of the resident, and status of the facility by phone or email. Additional updates may be provided on a regular basis to keep residents relatives/responsible parties apprised of the incident and the response.

The initial notification message to residents’ primary point of contact (e.g., relative) will include the following information:
- Nature of the incident;
- Status of resident;
- Restrictions on visitation; and
- Estimated duration of protective actions

When incident conditions do not allow the facility to contact residents’ relatives/responsible parties in a timely manner, or if primary methods of communication are unavailable, the facility will utilize local or state health officials, the facility website, and/or a recorded outgoing message on voicemail, among other methods, to provide information to families on the status and location of residents.

4.3.3 Media and General Public

During an emergency, the facility will utilize traditional media (e.g., television, newspaper, radio) and social media (e.g., Facebook, Twitter) to keep relatives and responsible parties aware of the situation and the facility’s response posture.

The Incident Commander—or Public Information Officer, if activated—may assign a staff member to monitor the facility’s social media pages and email account to respond to inquiries and address any misinformation.
5 Administration, Finance, Logistics

5.1 Administration

5.1.1 Preparedness

As part of the facility’s preparedness efforts, the facility conducts the following tasks:

- Identify and develop roles, responsibilities, and delegations of authority for key decisions and actions including the approval of the CEMP;
- Ensure key processes are documented in the CEMP;
- Coordinate annual CEMP review, including the Annexes for all hazards;
- Ensure CEMP is in compliance with local, state, and federal regulations; and

5.2 Finance

5.2.1 Preparedness

Facility-specific financial functions to account for preparedness-related costs (e.g., purchase of preparedness supplies, burn rates, etc.

5.2.2 Incident Response

Financial functions during an incident include tracking of personnel time and related costs, initiating contracts, arranging for personnel-related payments and Workers’ Compensation, tracking of response and recovery costs, and payment of invoices.

The Finance/Administration Section Chief or designee will account for all direct and indirect incident-related costs from the outset of the response, including:

- Personnel (especially overtime and supplementary staffing)
- Event-related resident care and clinical support activities
- Incident-related resources
- Equipment repair and replacement
- Costs for event-related facility operations
- Vendor services
- Personnel illness, injury, or property damage claims
- Loss of revenue-generating activities
- Cleanup, repair, replacement, and/or rebuild expenses
5.3 Logistics

5.3.1 Preparedness

Logistics functions prior to an incident include identifying and monitoring emergency resource levels, and executing mutual aid agreements, resource service contracts, and memorandums of understanding. These functions will be carried out pre-incident by the Administrator or their designee.

5.3.2 Incident Response

To assess the facility’s logistical needs during an incident, the Logistics Section Chief or designee will complete the following:

- Regularly monitor supply levels and anticipate resource needs during an incident;
- Identify multiple providers of services and resources to have alternate options in case of resource or service shortages; and
- Coordinate with the Finance Section Chief to ensure all resource and service costs are being tracked.
- Restock supplies to pre-incident preparedness levels,
- Coordinate distribution of supplies to service areas.
# 6 Plan Development and Maintenance

To ensure plans, policies, and procedures reflect facility-specific needs and capabilities, the facility will conduct the following activities:

## Table 10: Plans, Policies, and Procedures

<table>
<thead>
<tr>
<th>Activity</th>
<th>Led By</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Review and update the facility's risk assessment.</td>

- Pandemic and All-Hazards Preparedness Act (PAHPA) of 2006
- March 2018 DRAFT Nursing Home Emergency Operations Plan – Evacuation
- NYSDOH Healthcare Facility Evacuation Center Manual
- Nursing Home Incident Command System (NHICS) Guidebook, 2017
- Health Insurance Portability and Accountability Act (HIPAA) of 1996, Privacy Rule
- NYSDOH Healthcare Facility Evacuation Center Metropolitan Area Regional Office Region Facility Guidance Document for the 2017 Coastal Storm Season
- 10 NYCRR Parts 400 and 415
- NYS Exec. Law, Article 2-B
- Public Health Service Act (codified at 42 USC §§ 243, 247d, 247d-6b, 300hh-10(c)(3)(b), 311, 319)
Annexes
Annex A: Protective Actions

The Incident Commander may decide to implement protective actions for an entire facility or specific populations within a facility. A brief overview of protective action options is outlined in Table 11. For more information, refer to the NYSDOH Evacuation Plan Template, NYSDOH Healthcare Facility Evacuation Center Metropolitan Area Regional Office Region Facility Guidance Document for the 2018 Coastal Storm Season, and the NYSDOH Healthcare Facility Evacuation Center Manual.

Table 11: Protective Actions

<table>
<thead>
<tr>
<th>Protective Action</th>
<th>Potential Triggers</th>
<th>Authorization</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Defend-in-Place</strong></td>
<td>▪ Unforeseen disaster impacts cause facility to shelter residents in order to achieve protection.</td>
<td>▪ May be initiated by the Incident Commander <strong>ONLY</strong> in the absence of a mandatory evacuation order.</td>
</tr>
<tr>
<td></td>
<td>▪ May be initiated by the Incident Commander <strong>ONLY</strong> in the absence of a mandatory evacuation order.</td>
<td>▪ Does not require NYSDOH approval.</td>
</tr>
<tr>
<td><strong>Shelter-in-Place</strong></td>
<td>▪ Disaster forecast predicts low impact on facility.</td>
<td>▪ Can only be done for coastal storms.</td>
</tr>
<tr>
<td></td>
<td>▪ Facility is structurally sound to withstand current conditions.</td>
<td>▪ Requires <strong>pre-approval</strong> from NYSDOH prior to each hurricane season and <strong>re-authorization</strong> at time of the incident.</td>
</tr>
<tr>
<td></td>
<td>▪ Interruptions to clinical services would cause significant risk to resident health and safety.</td>
<td></td>
</tr>
<tr>
<td>Protective Action</td>
<td>Potential Triggers</td>
<td>Authorization</td>
</tr>
<tr>
<td>-------------------</td>
<td>-------------------</td>
<td>--------------</td>
</tr>
</tbody>
</table>
| **Internal Relocation** | ▪ Need to consolidate staffing resources.  
▪ Consolidation of mass care operations (e.g., clinical services, dining).  
▪ Minor flooding.  
▪ Structural damage.  
▪ Internal emergency (e.g., fire).  
▪ Temperature presents life safety issue. | ▪ Determined by facility based on safety factors.  
▪ If this protective action is selected, the NYSDOH Regional Office must be notified. |
| **Evacuation** | ▪ Mandatory or advised order from authorities.  
▪ Predicted hazard impact threatens facility capacity to provide safe and secure shelter conditions.  
▪ Structural damage.  
▪ Emergency and standby power systems failure resulting in facility inability to maintain suitable temperature. | ▪ Refer to the *NYSDOH Evacuation Plan Template*. |
| **Lockdown** | ▪ Presence of an active threat (e.g., active shooter, bomb threat, suspicious package).  
▪ Direction from law enforcement. | ▪ Determined by facility based on the notification of an active threat on or near the facility premises. |

**Internal Relocation** is the movement of residents away from threat within a facility.

**Evacuation** is the movement of residents to an external location (e.g., a receiving facility) due to actual or anticipated unsafe conditions.

**Lockdown** is a temporary sheltering technique used to limit exposure of building occupants to an imminent hazard or threat. When “locking down,” building occupants will shelter inside a room and prevent access from the outside.
Annex B: Resource Management

1. Preparedness

Additionally, the facility maintains an inventory of emergency resources and corresponding suppliers/vendors, for supplies that would be needed under all hazards, including:

- Generators
- Fuel for generators and vehicles
- Propane tanks
- Food and water for a minimum of 72 hours for staff and residents
- Disposable dining supplies and food preparation equipment and supplies
- Medical and over-the-counter pharmaceutical supplies
- Personal protective equipment (PPE), as determined by the specific needs for each hazard
- Emergency lighting, cooling, heating, and communications equipment
- Resident movement equipment (e.g., stair chairs, bed sleds, lifts)
- Durable medical equipment (e.g., walkers, wheelchairs, oxygen, beds)
- Linens, gowns, privacy plans
- Housekeeping supplies, disinfectants, detergents
- Resident specific supplies (e.g., identification, medical risk information, medical records, physician orders, Medication Administration Records, Treatment Administration Records, Contact Information Sheet, last 72 hours of labs, x-rays, nurses’ notes, psychiatric notes, doctor’s progress notes, Activities of Daily Living (ADL) notes, most recent History and Physical (H&P), clothing, footwear, and hygiene supplies)
- Administrative supplies

The facility’s resource inventory will be updated annually to ensure that adequate resource levels are maintained, and supplier/vendor contact information is current.

2. Resource Distribution and Replenishment

During an incident, the Incident Commander—or Logistics Section Chief, if activated—will release emergency resources to support operations. The Incident Commander—or Operations Section Chief, if activated—will ensure the provision of subsistence needs.

The Incident Commander—or Planning Section Chief, if activated—will track the status of resources used during the incident. When defined resource replenishment thresholds are met, the Planning Section Chief will coordinate with appropriate staff to replenish resources, including:

- Procurement from alternate or nontraditional vendors
- Procurement from communities outside the affected region
- Resource substitution
- Resource sharing arrangements with mutual aid partners
- Request for external stockpile support from healthcare associations, local emergency management.

3. Resource Sharing

In the event of a large-scale or regional emergency, the facility may need to share resources with mutual aid partners or healthcare facilities in the community, contiguous geographic area, or across a larger region of the state and contiguous states as indicated.

4. Emergency Staffing

4.1. Off-Duty Personnel

If off-duty personnel are needed to support incident operations, the facility will conduct the following activities in accordance with facility-specific employee agreements: [Modify table to reflect facility-specific processes for notifying and recalling off-duty personnel]

<table>
<thead>
<tr>
<th>Table 12: Off-Duty Personnel Mobilization Checklist</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Off-Duty Personnel Mobilization Checklist</strong></td>
</tr>
<tr>
<td>□ The senior most on-site facility official will confirm that mobilization of off-duty personnel is permissible (e.g., overtime pay).</td>
</tr>
<tr>
<td>□ Once approved, Department Managers will be notified of the need to mobilize off-duty personnel.</td>
</tr>
<tr>
<td>□ Off-duty personnel will be notified of the request and provided with instructions including:</td>
</tr>
<tr>
<td>□ ▪ Time and location to report</td>
</tr>
<tr>
<td>□ ▪ Assigned duties</td>
</tr>
<tr>
<td>□ ▪ Safety information</td>
</tr>
<tr>
<td>□ ▪ Resources to support self-sufficiency (e.g., water, flashlight)</td>
</tr>
<tr>
<td>□ Once mobilized, off-duty staff will report for duty as directed.</td>
</tr>
<tr>
<td>□ If staff is not needed immediately, staff will be requested to remain available by phone.</td>
</tr>
</tbody>
</table>
To mobilize additional off-duty staff, the facility may need to provide additional staff support services (e.g., childcare, respite care, pet care). These services help to incentivize staff to remain on site during the incident, but also need to be carefully managed (e.g., reduce liability, manage expectations).

Contact staffing agencies, as needed

4.2. Other Job Functions

In accordance with employment contracts, collective bargaining agreements, etc., an employee may be called upon to aid with work outside of job-prescribed duties, work in departments or carry out functions other than those normally assigned, and/or work hours in excess of (or different from) their normal schedule. Unless temporarily permitted by an Executive Order issued by the Governor under section 29-a of Executive Law, employees may not be asked to function out-of-scope of certified or licensed job responsibilities.

The Incident Management Team will request periodic updates on staffing levels (available and assigned). In addition to deploying clinical staff as needed for resident care activities, non-medical assignments from the labor pool may include:

- Security augmentation
- Runners / messengers
- Switchboard support
- Clerical or ancillary support
- Transportation
- Resident information, monitoring, and one-on-ones, as needed
- Preparing and/or serving meals, snacks, and hydration for residents, staff, visitors, and volunteers
- Cleaning and disinfecting areas, as needed
- Laundry services
- Recreational or entertainment activities
- Providing information, escorts, assistance, or other services to relatives and visitors
- Other tasks or assignments as needed within their skill set, training, and licensure/certification.

In accordance with employment contracts, collective bargaining agreements, etc., and at the determination of the Incident Commander, all or some staff members may be changed to 12-hour emergency shifts to maximize staffing. These shifts may be scheduled as around regular work hours, in six or 12-hour shifts, or as needed to meet facility emergency objectives.
4.3. Surge Staffing

If surge staffing is required—for example, staff has become overwhelmed—it may be necessary to implement surge staffing (e.g., staffing agencies).

The facility may coordinate with pre-established credentialed volunteers included in the facility roster or credentialed volunteers associated with programs such as Community Emergency Response Team (CERT), Medical Reserve Corps (MRC), and ServNY.

The facility will utilize emergency staffing as needed and as identified and allowed under executive orders issued during a given hazard/emergency.
Annex C: Emergency Power Systems

1. Capabilities

In the event of an electrical power disruption causing partial or complete loss of the facility’s primary power source, the facility is responsible for providing alternate sources of energy for staff and residents (e.g., generator).

In accordance with the facility’s plans, policies, and procedures, the facility will ensure provision of the following subsistence needs through the activation, operation, and maintenance of permanently attached onsite generators:

- Maintain temperatures to protect resident health and safety and for the safe and sanitary storage of provisions;
- Emergency lighting;
- Fire detection and extinguishing, and alarm systems; and
- Sewage and waste disposal.

2. Resilience and Vulnerabilities

Onsite generators and associated equipment and supplies are located, installed, inspected, tested, and maintained in accordance with the National Fire Protection Association’s (NFPA) codes and standards.

In extreme circumstances, incident-related damages may limit generator and fuel source accessibility, operability, or render them completely inoperable. In these instances, an urgent or planned evacuation will be considered if a replacement generator cannot be obtained in a timely manner.

---

13 CMS requires healthcare facilities to accommodate any additional electrical loads the facility determines to be necessary to meet all subsistence needs required by emergency preparedness plans, policies, and procedures. It is up to each facility to make emergency power system decisions based on its risk assessment and emergency plan.
Annex D: Training and Exercises

1. Training

To empower facility personnel and external stakeholders (e.g., emergency personnel) to implement plans, policies, and procedures during an incident, the facility will conduct the following training activities:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Led By</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Conduct comprehensive orientation to familiarize new staff members with the CEMP, including PEP specific plans, the facility layout, and emergency resources.</td>
<td>Staff Development</td>
<td>Orientation held within 30 days of employment.</td>
</tr>
<tr>
<td>Incorporate into annual educational update training schedule to ensure that all staff are trained on the use of the CEMP, including PEP specific plans, and core preparedness concepts.</td>
<td>Staff Development</td>
<td>Annually</td>
</tr>
<tr>
<td>Maintain records of staff completion of training.</td>
<td>Staff Development</td>
<td>Continual</td>
</tr>
<tr>
<td>Ensure that residents are aware appropriately of the CEMP, including PEP specific plans, including what to expect of the facility before, during, and after an incident.</td>
<td>Social Services</td>
<td>Admission Paperwork</td>
</tr>
<tr>
<td>Identify specific training requirements for individuals serving in Incident Management Team positions.</td>
<td>Administration</td>
<td>Annually</td>
</tr>
</tbody>
</table>
2. Exercises

To validate plans, policies, procedures, and trainings, the facility will conduct the following exercise activities:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Led By</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Conduct one operations-based exercise (e.g., full-scale or functional exercise).(^{14})</td>
<td>Administration</td>
<td>Annually</td>
</tr>
<tr>
<td>Conduct one discussion-based exercise (e.g., tabletop exercise).</td>
<td>Administration</td>
<td>Annually</td>
</tr>
</tbody>
</table>

3. Documentation

3.1. Participation Records

In alignment with industry best practices for emergency preparedness, the facility will maintain documentation and evidence of course completion through sign-in sheets and in-service logs.

3.2. After Action Reports

The facility will develop After Action Reports to document lessons learned from tabletop and full-scale exercises and real-world emergencies and to demonstrate that the facility has incorporated any necessary improvements or corrective actions.

After Action Reports will document what was supposed to happen; what occurred; what went well; what the facility can do differently or improve upon; and corrective action/improvement plan and associated timelines.

\(^{14}\) If a facility activates its CEMP due to a disaster, the facility is exempt from the operational exercise for the year ending November 15. A facility is only exempt if the event is fully documented, a post-incident after action review is conducted and documented, and the response strengths, areas for improvement, and corrective actions are documented and maintained for three (3) years. However, the secondary requirement for a tabletop exercise still applies.
Annex E: Infectious Disease/Pandemic Emergency

The circumstances of infectious disease emergencies, including ones that rise to the level of a pandemic, vary due to multiple factors, including type of biological agent, scale of exposure, mode of transmission and intentionality. Infectious disease emergencies can include outbreaks, epidemics and pandemics. The facility must plan effective strategies for responding to all types of infectious diseases, including those that rise to the higher level of pandemic.

The following Infectious Disease/Pandemic Emergency Checklist outlines the hazard-specific preparedness, response, and recovery activities the facility should plan for that are unique to an incident involving infectious disease as well as those incidents that rise to the occasion of a pandemic emergency. The facility should indicate for each checklist item, how they plan to address that task.

The Local Health Department (LHD) of each New York State county, maintains prevention agenda priorities compiled from community health assessments. The checklist items noted in this Annex include the identified LHD priorities and focus areas. Nursing homes should use this information in conjunction with an internal risk assessment to create their plan and to set priorities, policies and procedures.

This checklist also includes all elements required for inclusion in the facility’s Pandemic Emergency Plan (PEP), as specified within the new subsection 12 of Section 2803, Chapter 114 of the Laws of 2020, for infectious disease events that rise to the level of a pandemic.

To assure an effective, comprehensive and compliant plan, the facility should refer to information in Annex K of the CEMP Toolkit, to fully understand elements in the checklist including the detailed requirements for the PEP.

A summary of the key components of the PEP requirements for pandemic situations is as follows:

- development of a Communication Plan,
- development of protection plans against infection for staff, residents, and families, including the maintenance of a 2-month (60 day) supply of infection control personal protective equipment and supplies (including consideration of space for storage), and
- A plan for preserving a resident’s place in and/or being readmitted to a residential health care facility or alternate care site if such resident is hospitalized, in accordance with all applicable laws and regulations.
Finally, any appendices and documents, such as regulations, executive orders, guidance, lists, contracts, etc. that the facility creates that pertain to the tasks in this Annex, and/or refers to in this Annex, should be attached to the corresponding Annex K of the CEMP Toolkit rather than attached here, so that this Annex remains a succinct plan of action.

**Additional Preparedness Planning Tasks for Pandemic Events**

| ☐ Required | **In accordance with PEP requirements**, Develop/Review/Revise a Pandemic Communication Plan that includes all required elements of the PEP. The facility has developed a communication plan that includes Webex, Zoom and email that is outlined in the CCNF’s Emergency Preparedness Plan and COVID-19 policy. |
| ☐ Required | **In accordance with PEP requirements**, Development/Review/Revise plans for protection of staff, residents and families against infection that includes all required elements of the PEP. The facility’s Emergency Preparedness Plan covers the protection of residents and staff. Key nursing staff and medical providers have significant input in development. |

**Response Tasks for all Infectious Disease Events:**
| Recommended | The facility will implement the following procedures to obtain and maintain current guidance, signage, advisories from the NYSDOH and the U.S. Centers for Disease Control and Prevention (CDC) on disease-specific response actions, e.g., including management of residents and staff suspected or confirmed to have disease. The facility monitors and revises all policies based on current NYSDOH and CDC recommendations. |
| Required | The facility will assure it meets all reporting requirements for suspected or confirmed communicable diseases as mandated under the New York State Sanitary Code (10 NYCRR 2.10 Part 2), as well as by 10 NYCRR 415.19. (see Annex K of the CEMP toolkit for reporting requirements). The facility has policies for reporting suspected or confirmed cases via NHSN, NORA and HERDS. |
| Required | The facility will assure it meets all reporting requirements of the Health Commerce System, e.g. HERDS survey reporting. The facility reports all data via the HCS system at intervals determined by NYSDOH. |
| Recommended | The Infection Control Practitioner will clearly post signs for cough etiquette, hand washing, and other hygiene measures in high visibility areas. Consider providing hand sanitizer and face/nose masks, if practical. |
| Recommended | The facility will implement the following procedures to limit exposure between infected and non-infected persons and consider segregation of ill persons, in accordance with any applicable NYSDOH and CDC guidance, as well as with facility infection control and prevention program policies list. The facility limits group activities, cohorting of residents, enforces social distancing amongst residents, and limits unnecessary trips outside the facility. |
| Recommended | The facility will implement the following procedures to ensure that as much as is possible, separate staffing is provided to care for each infection status cohort, including surge staffing strategies: Facility will make every effort to have dedicated staffing and eliminate floating of staff. |
| Recommended | The facility will conduct cleaning/decontamination in response to the infectious disease in accordance with any applicable NYSDOH, EPA and CDC guidance, as well as with facility policy for cleaning and disinfecting of isolation rooms. |
| Required | The facility will implement the following procedures to provide residents, relatives, and friends with education about the disease and the facility’s response strategy at a level appropriate to their interests and need for information list facility-specific procedures. The facility will develop information to distribute based on current medical facts, and will distribute in an email or news press release. |
| Recommended | The facility will contact all staff, vendors, other relevant stakeholders on the facility’s policies and procedures related to minimizing exposure risks to residents provide information regarding facility-maintained list of external stakeholders to be contacted and mechanisms for sharing this information. The facility has a current list of vendors who have been apprised of the current pandemic situation. Vendors have been spoken to via phone, but can also be contacted via phone or email. |
Required

Subject to any superseding New York State Executive Orders and/or NYSDOH guidance that may otherwise temporarily prohibit visitors, the facility will advise visitors to limit visits to reduce exposure risk to residents and staff.

If necessary, and in accordance with applicable New York State Executive Orders and/or NYSDOH guidance, the facility will implement the following procedures to close the facility to new admissions, limit visitors when there are confirmed cases in the community and/or to screen all permitted visitors for signs of infection: The facility currently screens all staff for signs or infection. When inside visitation resumes, visitors will also be screened. If visitation is paused, families will be notified either by phone, email, direct mailing, or press release.

Additional Response Tasks for Pandemic Events:

Recommended

Ensure staff are using PPE properly (appropriate fit, don/doff, appropriate choice of PPE per procedures). The Director of Nursing and Infection Preventionist has ensured that all staff were fitted with proper PPE. Facility staff also educated on proper use and replacement.

Required

*In accordance with PEP requirements*, the facility will follow the following procedures to post a copy of the facility’s PEP, in a form acceptable to the commissioner, on the facility’s public website, and make available immediately upon request: The facility will post the Pandemic Plan of the Chemung County Nursing Facility website on 9/15/20, and update as needed.

Required

*In accordance with PEP requirements*, the facility will utilize the following methods to update authorized family members and guardians of infected residents (i.e., those infected with a pandemic-related infection) at least once per day and upon a change in a resident’s condition: The facility will use phone calls and emails to update families.

Required

*In accordance with PEP requirements*, the facility will implement the following procedures/methods to ensure that all residents and authorized families and guardians are updated at least once a week on the number of pandemic-related infections and deaths at the facility, including residents with a pandemic-related infection who pass away for reasons other than such infection: The facility will primarily use phone calls and email to notify families/responsible parties about pandemic related infections. Residents will receive in-person notification.

Required

*In accordance with PEP requirements*, the facility will implement the following mechanisms to provide all residents with no cost daily access to remote videoconference or equivalent communication methods with family members and guardians: The facility has 5 tablets available for resident use to communicate with family/friends.

Required

*In accordance with PEP requirements*, the facility will implement the following process/procedures to assure hospitalized residents will be admitted or readmitted to such residential health care facility or alternate care site after treatment, in accordance with all
applicable laws and regulations, including but not limited to 10 NYCRR 415.3(i)(3)(iii), 415.19, and 415.26(i); and 42 CFR 483.15(e): The facility will seek out appropriate placement for any resident that cannot be taken care of in the facility or dedicated unit.

In accordance with PEP requirements, the facility will implement the following process to preserve a resident's place in a residential health care facility if such resident is hospitalized, in accordance with all applicable laws and regulations including but not limited to 18 NYCRR 505.9(d)(6) and 42 CFR 483.15(e): The facility will readmit all residents who were hospitalized and they can safely care for.

In accordance with PEP requirements, the facility will implement the following planned procedures to maintain or contract to have at least a two-month (60-day) supply of personal protective equipment (including consideration of space for storage) or any superseding requirements under New York State Executive Orders and/or NYSDOH regulations governing PPE supply requirements executed during a specific disease outbreak or pandemic. As a minimum, all types of PPE found to be necessary in the COVID pandemic should be included in the 60-day stockpile.

This includes, but is not limited to:
- N95 respirators
- Face shield
- Eye protection
- Gowns/isolation gowns
- Gloves
- Masks
- Sanitizer and disinfectants (meeting EPA Guidance current at the time of the pandemic)

The facility currently has 60-day supplies of all required PPE. PPE is stored in our central supply area and managed by the Central Supply Director.

Recovery for all Infectious Disease Events

The facility will maintain review of, and implement procedures provided in NYSDOH and CDC recovery guidance that is issued at the time of each specific infectious disease or pandemic event, regarding how, when, which activities/procedures/restrictions may be eliminated, restored and the timing of when those changes may be executed.

The facility will communicate any relevant activities regarding recovery/return to normal operations, with staff, families/guardians and other relevant stakeholders.
